# ZEO

## PRECISION, DURABILITY AND COMFORT

The pneumatically balanced ZEO is an engineering marvel of precision, durability and comfort. It uses a durable chrome-plated marine brass metal valve to deliver a phenomenal breathing experience with extensive diver control over the air flow profile at any depth.

The ZEO comes standard with an in-line hose swivel, inhalation effort control, dynamic adjustment technology dive/pre-dive switch and a super comfortable orthodontic mouth piece. The new cold forged, over-balanced diaphragm FDX-i first stage comes with DVT and is environmentally sealed. The in-line design limits the pressure loss inherent in "L" type first stage designs making the FDX-i more efficient and lighter due to its compact form.

### SECOND STAGE

Valve Type	Demand
Adjustment(s)	A.V.S. (pre-dive) & Flow Adjust
Balancing System	Pneumatic
Mouthpiece	Orthodontic with Tabs
Nitrox Compatibility	Standard to 40%
Weight (without Hose)	204 g
Dimensions (Front Profile)	2.3 inch x 3 inch (oval shape)
First Stage Configurations	FDX-i
Work of Breathing	0.80 Joules

### FDX-I (FIRST STAGE)

Valve Type	Balanced Diaphragm
Primary Material	Forged Marine Brass
Pressure Ports	LP (4), HP (2)
Dry Valve Technology	✓
Weight	596 g
Nitrox Compatibility	Standard to 40%
Sealed Valve Design	✓
Environmental Protection	✓

PART #	DESCRIPTION	RETAIL
40-8120-07	ZEO / FDXI, MAXFLEX, SWIVEL, INT, BLACK	549,00

# GT 3

The GT 3 puts you in total control with its patented Dynamic Adjustment feature. Whether you're snorkeling to your dive site or working a current on your favorite deep wreck, you can quickly adjust the GT 3 to behave precisely the way you want, then let it do the work as it automatically readjusts with changes in depth.

## SECOND STAGE

Valve Type	Demand
Adjustment	Knob
Balancing System	Mechanical

Factory Set Inhalation Effort	0.0—2.5 CIW*
Work of Breathing	.98 Joules

PART #	DESCRIPTION	RETAIL
40-3431-23	GT3 / CDX5 DIN, NON DVT, MAXFLEX, METAL RING	334,95
40-3430-23	GT3 / CDX5 INT, NON DVT, MAXFLEX, METAL RING	334,95

# ALPHA 9

We set out to make a "standard" regulator that was simple, dependable and economical. What we didn't expect was that in tests it would outperform other high-end regulators. With the Alpha 9, you get effortless breathing in a compact design that is extremely tough yet easy to maintain and service.

- Best performance to price ratio on the market
- Simple design outperforms many more expensive models
- No switches or adjustments
- Paired with SP-6 and CDX-5

## SECOND STAGE

Valve Type	Demand
Adjustment	Balancing System
Integrated Purge Button	✓
Mouthpiece	Orthodontic

# DIVERLOG

DO SOMETHING WITH YOUR DATA.

DiverLog is a digital log book for recording your dives. It allows you to upload or input manually, sync review and save data recorded by your dive computer.

**DESKTOP**

Record and log all your dives on your Apple Computer.

**MOBILE**

Log, view and share your dives with your iPad or iPhone.

**CLOUD**

Sync, store & share your dives with DiveCloud.

# VTX

## READY, SET, DIVE.

The future of personal dive computers powered by OLED color display and Bluetooth technology has arrived. Cutting edge technology coupled with powerful features could not be any easier to experience. A hoseless, air-integrated computer with patented air time remaining algorithm. High contrast OLED color screen, tilt compensated 3-axis digital compass, Bluetooth ready, up to 4 nitrox mixes, user replaceable battery, and an intuitive push button menu system.

Computer Type	Hoseless Air-Integrated
Modes	Norm (Air & Nitrox), Gauge, Free Dive & Compass

# PROPLUS X

Full-Color TFT Display for superior readability and ease-of-use

Color coded – selections, events, status, alarms.

Modern PDA-like User-Interface with button prompts and clear text labels

3-Axis Digital Compass

Seamless integration with desktop, mobile and cloud-based applications

4 Intuitive Control Buttons

4 Gas – mixes to 100% with individual PO2

Earmark tag (dive events) – Log

Bluetooth 4.0LE - improved compatibility. Always ON for improved connectivity.

TLBG & VARI – 0 to 100% sliding scale, color by status.

Brightness – auto dim plus user adjust.

Battery - Lithium ion rechargeable, 25 hour per charge at max power, serviceable, USB and wall charging

Quick disconnect hose

TFT Display - superior readability in bright conditions

Bluetooth 4.0LE - improved compatibility; always on (must be in menu - not dive surface mode)

Modern user interface - 4 control buttons, very clear ID of settings and options, button prompts, intuitive use of color to communicate status.

Rechargeable battery - may be replaced by dealer, potentially consumer.

High resolution bar graphs.

Dual Algorithm

## WHAT'S IN THE BOX

PPX with quick disconnect hp hose, Neoprene protective sleeve, USB nest/USB cable, Quick Start Guide, wall charger, including International adapters, Lens protector

## DIVERLOG MOBILE SOFTWARE

The ProPlus X has the unique capability to pair with Diverlog mobile software via Bluetooth 4.0. Control your settings, view log and profile data, add locations, notes, and even share dives via email, Facebook and more. Whether you're on the boat, on the beach or in your home.

PART #	DESCRIPTION	RETAIL
04-1029	PRO PLUS X, COMPLETE, WITH QUICK-DISCONNECT	TBA

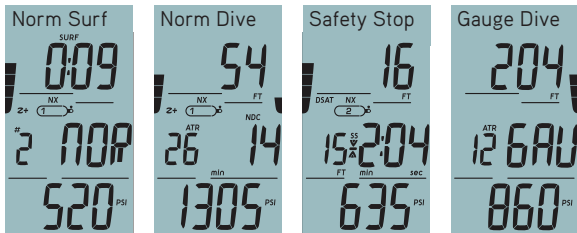

# PROPLUS 3

## NO MORE SQUINTING

Dive computers are supposed to deliver crucial data quickly and without confusion. We agree. That's why the new ProPlus 3.0 combines a huge display area with the largest and most legible digits on the market, an intuitive user interface and a host of major feature enhancements. See it for yourself.

04-1072-07	PRO PLUS 3, WITH QUICK DISCONNECT AND COMPASS	525,00

# OCL LOW-PROFILE

Introducing the OCL, a fully capable dive computer packed into a stylish and amazingly low-profile design. This dive computer's uniquely small form factor means that it doesn't have to live with your dive gear between dives. The OCL features Oceanic's exclusive Dual Algorithm, custom alarms, Nitrox compatibility and replaceable batteries. It's as at home in the office as it is 100 feet down and with you everyday.

Computer Type	Stainless Steel Wristwatch

# VEO 1.0

## SIMPLE IS AS SIMPLE DOES

The Oceanic Veo 1.0 is a solid basic computer designed for air or single gas nitrox mixes up to 50 percent. It displays only essential information during the dive in easy-to-read digits; uses effective bar graphs to present nitrogen loading and ascent rate; and offers useful features like an automatic safety stop countdown timer that ticks off three minutes when you ascend to 15 feet. A single push button is all that's required to navigate the settings and the sequences are intuitive with help from the excellent owner's manual and waterproof prompt card. At this price point, you are giving up bells and whistles in favor of an excellent and easy to use, low-cost computer.

Computer Type	Module, Wrist or Console
Modes	Norm (Air / Nitrox)
Push Buttons	1
User Interface	Click Forward
Nitrox Mixes	1 (21 - 50%)
Algorithm	Dual Algorithm™

Nitrox compatible to 50%

OceanGlo® luminescent gauge face absorbs light

Shock resistant bourdon tube mechanism

Integrated temperature gauge

One-way safety valve

500 psi fluorescent caution zone

## PONY BOTTLE GAUGE

Nitrox compatible

Threads directly into any standard first stage high pressure port

One-way safety valve

Large numbers and green, yellow and red indicators

## MAXDEPTH PRO

Non-linear depth scale is easier to read in shallow depths, and makes it much easier to maintain safety stop depths

OceanGlo® luminescent gauge face absorbs light and glows approximately 7 times faster and longer than conventional glow-in-the-dark materials

200' / 60m maximum depth reading

Automatic maximum depth indicator

## NAVCON SWIV2

The MaxDepth SWIV 2 gauge is still one of the most dependable instruments around for divers who are just starting out or don't feel they need the advanced features of a Personal Dive Computer just yet. But don't worry, Oceanic's modular gauge design allows you to easily swap out the depth gauge module with a PDC as your needs change and your experience grows.

# ATMOS TWO-IN-ONE

The Atmos is a durably-constructed, full-featured hybrid air-cell BC. It's unique, hybrid rear-inflation bladder enables air to "shift," which provides maximum amount of lift and keeps you properly orientated on or below the surface.

20 lbs (9 kg) of integrated weight in the Pinch & Release system and 10 lbs (4.5 kg) trim

Padded backplate features an extended lumbar support to transfer tank weight onto hips, relieving shoulder stress

Three (3) over pressure relief valves optimize buoyancy control

Crucial areas constructed of 1000D denier Cordura fabric

2 large, zippered pockets with knife mounting grommets

Adjustable depth-compensating cummerbund

Lift capacity: SM 30 lbs (130 N); MD 35 lbs (155 N); LG 45 lbs (200 N); XL 55 lbs (240 N)

# HERA

## LADIES-ONLY BCD

### JACKET STYLE

Just for the ladies; fit, comfort, a host of female-friendly features, and absolutely gorgeous styling. Maybe you've checked out women's-specific BCs before at your local shop but never really got what the hype was about. Sure they have different graphics and size ranges, but what is the real advantage of a women's-specific BC?

The HERA is built from the ground up for you – designed specifically around the female form with ample adjustments to make it your own, without sacrificing the features and functionality that the most discriminating divers demand. This may just be the most comfortable, best fitting BC you've ever worn.

Designed specifically for women divers Custom Fit Harness™

Patented BioFlex® Hybrid bladder

Adjustable depth-compensating cummerbund

Pre-bent welded stainless steel D-rings

Reinforced contoured shoulders

QLR Integrated Weight System 20 lbs plus dual 5 lb rear

# OCEANVU SEA. MORE.

The OceanVu, the latest dive mask from Oceanic. Superior materials, technology & design give you the best visibility, fit & comfort possible in a dive mask. Wear the OCEANVU during your dives and see more ocean than ever before.

High-performance Crystal-Clear silicone, a premium material that provides remarkable transparency, improved fit and comfort.

UltraClear optical quality tempered glass lenses optimize clarity, light transmission, and color consistency for the best possible visibility, especially in low light conditions.

SureFit™ Buckle Tensioning System evenly distributes the tension exerted by the strap over a firmer silicone band for support, maximizing seal and comfort.

Quick adjusting sliding buckles allow simple, fine adjustments and release of the strap.

The Ocean Vu may be easily fitted with Corrective Optical Lenses from -1.5 to -6 Diopters in 0.5 increments. Lenses are manufactured from optical quality UltraClear tempered glass.

Ultra-thin feathered skirt beneath the nose for comfort and improved sealing.

Textured and easy to squeeze nose pocket allows one handed equalization.

Rubberized frame inserts improve grip to aid clearing.

Ultra light weight and low internal volume for dramatically improved field of vision – up, down and side to side.

## INSPIRED BY NATURE

### THREE ADVANCED MATERIALS

Inspired by nature, these materials simulate the shape & mechanics of marine animals.

1. **TECHNO-POLYMER BLADE:** Advanced material provides the strength of bone to maximize power, speed & efficiency, while being extremely lightweight & durable.
2. **POWER-X SYSTEM:** Revolutionary material acts as tendon & joint, optimizing propulsion by flexing during the downstroke and releasing stored energy prior to the upstroke. Unique positioning allows the Power-X System to deliver maximum power to the blade while evenly distributing pressure over the foot to minimize fatigue.
3. **POWER CHANNEL:** The flexible material simulates the elasticity of skin by directing water flow off the back of the blade for increased thrust.

### SOFT-PAD HEEL STRAP

An ergonomic finger-loop allows the fin to be easily removed & replaced, even with thick neoprene gloves

### EASY BUCKLE ADJUSTMENT (EBA)

Allows for more than 2" (5 cm) of precise adjustments for a custom fit without tools.

### WINGLETS

Inspired by aircraft technology, placed along the length of the blade, winglets increase efficiency and improve maneuverability.

## VORTEX V-16

VROOM! Speed, comfort, and maneuverability; you can have it all with the Vortex V-16. The V-16 combines the patented design concepts divers have come to expect from Oceanic with a new mix of materials that enhance performance and style. Compared to conventional fins, the V-16 is up to 30% faster and more efficient, with less effort, stress and strain resulting in greater comfort and control.

---

Patented Nature's Wing propeller fin technology

---

Three materials for ideal flex and memory

---

Semi-rigid battens and rubber flex channels

---

Oversized side rails add rigidity to the oversized blades

---

Ergonomically designed foot pocket

---

Easy on/off thumb loop

---

Comes with spring straps

# ACCEL

## ONE FIN, ANY OCEAN

If you favor power over frills, you'll love the Accel. Compact and responsive, its clean lines and efficient shape make it an excellent all-around fin.

Unique, high-stretch heel straps are effortless to slip on and off and dramatically reduce the bulk and drag associated with typical open heel fins. The angled, compact blade has excellent water flow characteristics and also allows divers to swim efficiently with multiple kicking styles, from scissor to frog to sculling. The blade's center channel, along with pronounced side rails, also helps minimize "side spill," directing water behind the diver for maximum thrust.

Unique heel strap design is effortless to slip on and off

Minimize inventory & customize your Accel fins

Design offers excellent water flow characteristics

Center channel and side rails help minimize "side spill"

Less than 3lbs per pair

Maximum length (size XL-XXL) only 21 inches

## ENZO FREE DIVE FIN

The Enzo Freedive Fin is a purpose-designed spear fishing and freediving fin with special composite construction technology. The Enzo is an excellent choice for the beginning to experienced freediver. Its unique performance characteristics feature a more flexible, lightweight design with a comfortable fitting foot pocket.

---

Blade made of polypropylene composite material alloy

---

Foot pocket made of thermoplastic rubber, soft for comfort and hard for energy transfer to the blade

---

Lightweight and powerful—one medium fin weighs only 765 g

---

90 cm long x 22 cm wide

---

Many channels create significant water flow & increased thrust

---

## ENZO MASK / FIN / SNORKEL BAG

A great bag designed to carry those long blade fins and more. The newest addition to the Oceanpro Bag Collection.

---

Large enough to accommodate the Enzo Free Dive Fins

---

Pocket divider for mask/snorkel

---

Spacious enough to carry your LavaCore garment

---

Top handle and shoulder strap

---

Drain hole

---

## EVERYTHING YOU NEED FOR THAT BIG TRIP, ALL IN ONE PLACE.

This high-end bag is a traveling diver's must have. With a gratuitous 7,675 cubic inches of storage space you can bring all your gear and even that kitchen sink you were forced to leave behind last time. We've used the highest quality materials, zippers, wheels and construction and backed it with a lifetime warranty against any defects in materials or workmanship for life of the product. What more could you ask for?

Capacity: 7,675 cu in of storage space

Retractable carry handle

#10 YKK self-healing zippers

Easy-access storage pocket

Front carry handle

Ultra-quiet Nylon wheels

Reinforced base and Hypalon reinforced corners

1620 Denier Ballistic Nylon construction

Dimensions: W 15.35 in. (39 cm), H 15.75 in. (40 cm), L 31.75 in. (73 cm)

Weight: 4.2 kg

PART #	DESCRIPTION	RETAIL
17-4768-07	WHEELED DUFFEL BAG	169,00

# DRY BAG

These dry bags are ideal for all types of outdoor adventures, from camping to white water rafting, boat trips to biking. The classic stuff sack design built to stay dry.

- PVC-tarpaulin
- 9"W x 21.25"H
- Three roll closure system
- Waterproof materials
- High-frequency welded and heat seal taped technique to make the bag watertight

# DRY BACKPACK

Our Oceanpro 30 Liter Capacity Dry Backpack incorporates a padded back panel and shoulder straps that allows airflow and comfort when loaded. A great dry backpack that's perfect for any outdoor activity.

- PVC-tarpaulin
- 12"W x 23.75"H
- Adjustable sternum strap
- Splashproof outer pocket zipper
- Three roll closure system
- Waterproof materials
- High frequency welded and heat seal taped

## 500SE OLD SCHOOL. NEW TECH.

The new 500SE utilizes a servo controlled valve to provide precision airflow and unparalleled performance for both air and trimix divers in a side exhaust configuration. To achieve this, we have perfected the original "lever-servo valve" we designed 35 years ago. Overbalanced diaphragm first stage also provides ideal hose routing for both backmount and sidemount users and optimum performance regardless of depth.

Pneumatically balanced servo valve system

Patented Orthodontic Mouthpiece for comfort and reduced jaw fatigue

Standard with 30" MaxFlex hose

Easily disassembled without the use of tools and underwater if necessary

Left- or right positioning—no upside-down

Boltsnap tie point

---

Completely new regulator design

---

Pneumatically balanced stainless steel valve results in smooth, easy breathing

---

Reversible demand valve, can be converted from right-handed hose configuration to left handed hose configuration

---

Adjustable Dive/Pre-Dive switch: Large Venturi lever has a soft rubber grip, which makes it easy to locate and use

---

"Industrial" Chrome Plated Brass Valve

---

Ergonomic exhaust channels bubbles away from field of view and reduces exhaust effort

---

Improved orthodontic mouthpiece with dual color tabs

---

Plastic Cosmetic Ring

---

Miflex(R) braided hose

---

Value - Low End Reg

---

Paired with the DC3 1st stage as Primary regulator

---

Lifetime Warranty

---

Free Parts for Life

---

2-Year Service Interval with Inspection

## L.T.S.

The L.T.S. Light Travel System is our latest warm water solution for traveling divers and destinations where weight restrictions are limited. Incorporating key features from our popular HD200, the L.T.S. is a weight integrated back inflation design with 30 lbs / 13.6 kg of lift, suitable for single AL80s and steel 85s. Its simple, non-modular design stows easy and weighs only 5 lbs.

---

Ideal for traveling divers, weighs only 5 lbs / 2.27 kg

---

30 lbs / 13.6 kg of lift capacity

---

Comfortable backpad

---

Chest and hip D-rings for accessories or sling bottle

---

Rugged 1000D nylon outer cover with 420D internal bladder

---

5 lbs dumpable integrated weight system

---

Available in four sizes SM, MD, LG, XL

# ELITE 2 HARNESS SYSTEM

Tech/Rec is at its best with the Elite 2 Harness. The Elite 2 Harness System offers you all the features of a technical harness with the added comfort that recreational divers look for.

Adjustable shoulder straps with quick release buckles

Easier donning and doffing of equipment

Adjustable and removable shoulder pads

316 marine grade stainless steel

Adjustable sternum strap included allows for custom fit

Backplate sold separately

System weight (harness only): 1.7 lb (0.77 kg)

# SOLO HARNESS SYSTEM

Designed to meet all the needs of demanding technical divers, the Solo Harness System is clean, simple, and foolproof!

Streamlined design enhances comfort with less drag

Continuous one piece harness system limits failure potential

Stainless steel D-rings and cam buckle included

Removable shoulder pads accept stainless steel D-rings

Backplate sold separately

System weight (harness only): 1 lb (0.45kg)

Solo Harness: One Size, Trim To Fit

# LX SERIES WINGS

## S25 LX, S38 LX, C45 LX, C60 LX

Hollis Gear is proud to release the new LX Series Wings, developed and tested by technical divers, and 3 years in the making. Quality and performance are the two most integral features of this product, which is why Hollis Gear has reintroduced the proven S Series and C Series Wings with key-Improvements.

Every wing in the LX Series includes a 360-degree internal retraction system that matches the design of the wing, allowing for a streamlined rig at all times. The exterior bladder is constructed of 1680D Cordura, the internal bladder of 420 nylon, which means these wings are tough. We're so confident in this series, every new LX wing includes a lifetime warranty.

---

1680D Cordura Exterior Bladder

---

420-Nylon Internal Bladder

---

360° Degree Internal Retraction System for a Streamlined Rig at All-Times

---

New Oval Corrugated Hose Power Inflator Mechanism

---

Redesigned Overpressure Relief Valve (OPV)

---

Corrosion Resistant Stainless Steel Drain Grommets

---

Welded Flange & One-Piece Retainer: Servicing w/o Need-for-Tools

---

Centrally-Located Inflator Mechanism Elbow: Avoids Tank Valve/Regulator Interference

---

Single Wing: Lower Left Pull Dump/Overpressure Relief Valve

---

Dual Wing: Lower Left and Lower Right Pull Dump/Overpressure Relief Valves

---

Hollis Power Inflator System: Durable Impact Resistant Plastic with a Corrugated Rubber Hose

---

Internal Components and Inlet Quick-Disconnect Nipple: Corrosion Resistant Chrome Plated Brass

---

Cam Band Slots for Cylinder Mounting

---

2-Models Single or Double LX Wing with 60lbs (27.2kg) Lift Capacities

---

Limited Lifetime Warranty

## EXPEDITION GRADE

Our SMS100 Sidemount system was designed not just with the sidemounts cave divers in mind, but any diver. Whether you are a beginner, advanced or technical diver, this kit was designed for you. Suitable for sidemounting twin or single cylinders, but also for use with rebreathers or rear mounted singles. This "go anywhere" system can be used in any environment from open water to the overhead environment. Ready to dive out of the box.

---

360 Degree wing—52 lbs lift

---

Bulletproof construction

---

Single or Dual wing options available

---

Centrally and uppermost located elbow to avoid overhead interference

---

Upper / Lower cam band slots for rear mounted single tank

---

Full visibility over your system

---

Reduces additional gear

---

Aids in transporting gear to and from the beach or boat

---

Streamlines profile & reduces drag, increasing bottom time

## SMS 75

Hollis has become a leader in the sidemount market. It is not just a fad and not just a tool for cavers, it's here to stay and is growing. The SMS 75 is an evolution from years of sidemount development. While it will cater more to hardcore cave divers, SMS 75 was created to handle all environments. Proper trim is key, and the wing is designed to promote horizontal diving with increased lift towards the hips where it's needed most. The SMS 75 will also support rear-mounted tanks and reversible inflator positions.

---

Trapezoid shape to promote horizontal trim

---

Adjustable and removable wing bungee

---

Designed for cave or open water sidemount

---

18 l buoyancy

---

Cam slots for single tank and grommets at 11" for banded doubles

---

Reversible Inflator & Dump assembly

---

Rigging kit included: Tank bungees, SS Cam bands, SS Bolt snaps & nylon line

---

Includes sternum strap & crotch strap

---

Inner located elbow to avoid overhead interference

---

# DX300-X

## BY TECH DIVERS, FOR TECH-DIVERS

The Hollis DX300-X was designed by technical divers, for technical divers. It provides absolute seam integrity, maneuverability and purpose. Three years in development, the DX300-X is the result of a combination of innovative ideas and proven technology from consumers, store owners, manufacturers and technicians who understand this demand.

Our patented BIAS cut combined with a telescopic torso increases freedom of movement, but allows for a closer fit reducing air migration

The wide flat seam construction minimizes the risk of leaks in high risk areas

Fitted with the new innovative T-ZIP, low profile & more flexible

Fitted with SiTech Neck Tite system with silicon seal

Fitted with SiTech Quick Change Solution Oval wrist system with silicon seals as standard

Two large Velcro® bellows pockets with an internal D ring

Double thickness kneepads

5mm neoprene socks

Adjustable suspenders included

The suit is supplied with a Hollis Drysuit Carry Bag

Drysuit bag included

Photo includes optional gaiters and canvas overboots

# BTR-500

## DRYSUIT

The new BTR-500 drysuit uses our latest Butyl Trilaminate Ripstop material to produce a lightweight but very durable suit. Everything from the material to the taping has been fine-tuned and optimized to make the BTR-500 an absolute pleasure to dive in, whether you are at 10m or 100m.

The BTR-500 uses our specially developed 600g/sqm Butyl Trilaminate Ripstop material which incorporates a 140g/sqm High Decitex Nylon 6.6 Ripstop external lining for optimum tear, puncture and abrasion resistance that has the benefit of a easy clean and wash down finish. The internal lining is made from a patented coating that maximizes water integrity and seam tape adhesion as well as making the suit easy to get in and out of. The internal coating also make suit repairs exceptionally easy.

As with all our suits each panel that makes up the BTR-500 is cut on the bias of the material to increase the stretch and flexibility of the material by up to 15%. This, combined with clever panel designs makes this front entry suit especially easy to get on without the need to struggle to get the neck seal over the head. A composite zip maintains flexibility in the torso and is protected by a Velcro secured flap.

---

Si-Tech inflator and auto shoulder dump

---

Composite front entry zip

---

Latex neck and wrist seals

---

Neoprene warm neck collar with adjustable Velcro fastening

---

Internal braces

---

Two front mounted zippered leg pockets

---

5mm thick neoprene socks

---

(boots are available instead of socks at an additional cost)

EXPOSURE | NEOTEK

# NEOTEK

Enjoy the warmth of our new Neotek coldwater hooded semi-dry. Constructed from a compression resistant 8/7/6mm neoprene and a Hollis exclusive ThermaSkin inner liner. Includes a front neckdam with revolutionary G-lock horizontal front zipper for easy on/off and a tight barrier against water intrusion. Arms and legs are also sealed against leaks with an internal dam. All seams are double glued and butt joined with a blind stitch construction which is all covered by a unique liquid seam. Fitted with generous pockets on both the left and right thigh and comes in 9 different sizes.

8/7/6 mm compression-resistant & superstretch neoprene mix

Exclusive "ThermaSkin" inner liner

G-lock horizontal front zipper with internal bib

Neck, wrist and ankle internal dams

Seams are quadruple glued and butt joined with a blindstitch

Liquid glued seams cover entire suit

Tech-friendly thigh pockets on both left and right thigh

Attached hood standard

Seams sewn and double taped for extreme protection

Latex seals

New: Heavy duty composite kneepads

EXPOSURE | BOOT, BEANIE & ACCESSORIES

## ROCK BOOT

---

Tough super grip rubberized sole

---

Lace top for a comfortable semi-custom fit

---

Rubberized toe and heel

---

Fin strap catch on heel

---

Sizes: 5 - 15

---

Drain holes on sides for quick drying

---

Padded sides and tongue for extra comfort

## NEO CLASSIC

The Neo Classic boot features a heavy-duty molded sole designed to withstand the rigors of diving on rocky coastlines and provide unparalleled stability on sandy beaches and boat decks as well.

---

6.5 mm neoprene thickness

---

6.5mm double-glued and blind-stitched neoprene construction

---

Molded sole with non-slip tread

---

Corrosion-proof zipper

---

Inner gusset to reduce water flow

## BEANIE

The ideal pre and post dive thermal protection for any diver trying to preserve core warmth.

# MASKS

	Frameless	Rigid Frame	Ultra Clear Glass	Standard Glass	Optical Lenses
M1	✓		✓		
M3		✓	✓		✓
M4	✓			✓	

## M1

Visibility is the most important aspect of any dive. The M1 mask raises the bar for optical quality and distortion free vision. This lens is an extra clear glass which is valued for its attractive appearance and optical qualities. The low iron content produces a higher light transmittance and a reduced green tint inherent in other glasses. This makes the lens distortion free and helps improve color and visibility in low light conditions underwater.

---

Frameless 100% pure silicon skirt

---

Saint-Gobain Diamant—crystal clear lens

---

Wide vision and low volume

---

## M4

When choosing a mask, fit and field of vision come first. The M-4 gives you the best of both worlds, fitting a wide variety of faces and offering superior peripheral and vertical vision. It is low profile, stows easy and carries an excellent value.

---

Frameless silicon skirt

---

Rugged mask box and adjustable mask strap included

---

Increased vision and low volume

---

PART #	DESCRIPTION	RETAIL

FINS | F1 - F2

## F1

Power without compromise. The Hollis F1 fin blends graceful movement, power, and bulletproof construction making it the standard in technical diving.

- High grade, heavy duty rubber construction
- Angled strap mounts for comfort & a better transition of power
- Spring heel straps w/ easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade to reduce stress while accelerating
- Generous foot pocket

## F2

Increase your power to weight ratio with our new F2 fins. If you are a traveling diver, looking to reduce weight or just favor a lightweight fin, look no further. The patented F2 is designed to add blade surface on both the downstroke and upstroke to increase your efficiency with any type of kick.

- High grade, heavy duty monoprene construction
- Angled strap mounts for comfort and a better transition of power
- Spring heel straps w/ easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade to reduce stress while accelerating
- Generous foot pocket with 3 sizes—Small, Regular and XL

LIGHTS | LED 3 & LED 6

## HANDHELD LEDS

Our first push into the Primary Lighting market included our innovative LED15 Canister System which offered a replacement and better alternative over traditional HID lighting and Multi-Array LED systems. Our goal was to revolutionize primary and backup lighting systems; doing so required extended burn times and efficiency while increasing output, but without the high price tag. We achieved our goal and now include this technology in our line of handheld lights. Meet the new range of LED lights; the envy of all professional and recreational divers worldwide.

### LED 3-M

- Single 3W backup Light
- Concentrated 8° beam
- 230 lumen output
- 6-hour total burn time
- 50,000 hours bulb life
- 6061-T6 anodized aluminum
- 3 AA alkaline batteries
- Depth rated to 650' / 200 m

### LED 6-M

- Single 6W backup Light
- Concentrated 8° beam
- Output 360 lumens
- 7-hour total burn time
- Bulb life 50,000 hours
- T6061-T6 anodized aluminum
- 3 C alkaline batteries
- Depth rated to 650 ft / 200 m
- Dimensions 1.81 in / 46 mm
- Diameter 8.11 in / 206 mm length
- Rear tie-point for boltsnap / lanyard included
- Double O-ring seals
- Custom aluminum reflector

# EXPLORER

SPORT REBREATHER

MAKE EVERY BREATH COUNT

# REBREATHERS

## OUR HISTORY

Bob Hollis had his first rebreather experiences in the mid 60's. He used Draeger units to allow him to get close to Sea Otters and other marine life in Monterey Bay. In 1970, Hollis made some of the first dives on the Electrolung rebreather using Heliox down to 300 feet in Honduras and Bonaire, filming ship wrecks and deep reefs. In 1990, Bob & Oceanic developed the "Phibian" rebreather, which at the time was the only commercially available unit.

In 2000, Hollis' parent company American Underwater Products under two separate contracts with the United States Naval Surface Warfare Command, developed and delivered a unit called the "ATUBA" (Advanced Tactical Underwater Breathing Apparatus). This solid back-ground of rebreather technology has led to the development of two new units; Prism 2 and Explorer Sport.

## HOLLIS REBREATHING DEALER SUPPORT COMMITMENT

As a consumer, you will receive a greater level of support from a Hollis Rebreather Dealer. Not because a non-Rebreather dealer doesn't care about support. Instead, the Hollis Rebreather Dealer has a greater level of commitment to the complete product line.

A Hollis Rebreather Dealer has perfected their diving skills and is at their peak of instruction. They will provide access to rebreather training, service, consumables, upgrades and travel. The view from a Hollis rebreather into the underwater realm is like a view from no other place on earth. Hollis Gear promises to deliver an experience like no other.

REBREATHERS | COMPARISON CHART

# EXPLORER

## RECREATIONALLY READY

The Hollis Explorer Sport is a true recreational Rebreather. Compact, lightweight and extremely easy to use. It's patent pending design is unique in using a single gas, Nitrox, and is electronically controlled to achieve an optimal balance of PPO2 and dive time. The unit uses pre-packed absorbent cartridges; easy setup; has optional CO2 tracking; 2 hour dive duration.

The Explorer's design makes it a dream for the recreational diver looking for a safe and easy way to explore the bottom at leisure and without disturbing the sealife with bubbles.

---

Nitrox Electronically Controlled Hybrid - uses readily available Nitrox in 32 - 40%

---

Simple user interface is easy to learn and easy to dive

---

Automated Pre-dive Setup assures the Explorer is ready to dive

---

Automated Breathing Loop control gives minimal bubbling and hydrostatically controlled buoyancy

---

Bail-out mouthpiece gives a quick one handed operation from closed circuit to open circuit

---

Simple Green or Red primary display

---

Scrubber thermal monitoring and optional CO2 sensing assures good gas in the breathing loop

---

PPO2 intelligently controlled for a proper balance of PPO2 & bottom time

---

Automated dive data logging

---

Back mounted counterlungs with streamlined cover to offer good protection

---

Modular component design makes it easy to setup and clean

---

Choice of BC: either traditional Jacket or Back inflate style

---

### PRIMARY DISPLAY (HUD)

The LED HUD option allows you to monitor your loop PO2 via the heads-up display using color LEDs mounted on the DSV. The actual loop PO2 for each of three sensors is displayed via a flashing code. The HUD functions independently of the controller using its own DiveCAN bus, its own power supply and electronics.

### SECONDARY DISPLAY (COMPUTER)

Explorer design utilizes a fixed PO2 and a semi-closed function from a single cylinder of nitrox; ranging from 32-40%. The intelligent electronics supplied with the unit have a pre-dive diagnostic sequence which runs with just a few prompts to the diver. The unit automatically analyses the gas mixture, adjusts accordingly and performs a series of checks including loop volume & optional CO2 detection during pre-breathe. Once the Explorer is "ready to dive" the diver is ready to safely enter the water.

HO.44

REBREATHERS | PRISM 2

# PRISM 2

## TECHNICALLY FOCUSED

The PRISM 2 is an electronically or manually controlled, constant PO2, modular, closed circuit diving system.

Shoulder mounted counterlungs provide easy breathing with low hydrostatic loading

Unit weight when fully charged, in standard configuration, approx. 47 lbs

3.5-liter split counterlungs allows inhale and exhale counterlungs for high work loads

Counterlung drains for easy to remove water during a dive

All gas lines external to the breathing loop prevents leaks from affecting the PPO2

Automatic diluent addition valve adds diluent during descent or when the loop volume is low

Manual diluent addition valve adds on board or off board diluent for loop flushing

Gases: Air, Trimix, and Heliox

Manual oxygen addition valve allows for manually controlling oxygen PPO2

High performance open circuit Bail Out Valve option

Integral harness and BC or backplate standard makes the Prism 2 ready to dive out of the box.

Full range of wings / harness gives the ultimate customization

Accepts 13, 19, or 30 cu ft cylinders for flexible gas management

Eye level LED Primary display provides easy to monitor system status

Displays PPO2 for each oxygen sensor is used to control PPO2 manually & assure electronics system is nominal

External power switch is easy to power on

Easy calibration with a push button O2 calibration

Large OLED Secondary Display is easy to read, even for your buddy

PPO2 Monitoring of Three Sensors Continuous display of each sensor's PPO2, mv reading easy to access

Closed Circuit & Open Circuit, 5 gases supports diluent switching & Multi-gas mix dive plans

2 button push OC bailout – If you have to leave the loop, quickly switches to bailout support

CNS Tracking based on real time oxygen exposure

### PRIMARY DISPLAY (HUD)

The primary Heads-Up-Display (HUD) consists of 3 bicolor (red/green) LEDs mounted on either the right or left side of the DSV/BOV mouthpiece just below eye level. Each LED provides a status indicator for its corresponding O2 sensor by using a "Smithers Code" flashing the status on a cycling 5-second loop during the dive.

### SECONDARY DISPLAY (COMPUTER)

The Shearwater Petrel is the computer display on the Prism 2 and was chosen for this application as it is one of the most advanced mixed gas CCR computers available today. The Petrel is designed to control the Prism 2 setpoint and uses a basic decompression algorithm known as Buhlmann ZHL-16C which has been modified by the use of Gradient Factors.

## Lavaskin

Lavaskin is a comfortable and advanced thermal material designed specifically for sun protection, performance, and comfort. It protects the user from rashes caused by abrasion, or sunburn from extended exposure to UV rays.

### OUTER LAYER

Flexible, durable and water repellent outer layer facilitates fast water run-off and quick drying. UPF 50+

### INNER LAYER

Warm, moisture wicking and anti-bacterial inner fleece lining feels good on your skin and helps to support your core warmth above and below the surface.

## Polytherm

LavaCore suits are made with our exclusive Polytherm™ Tri-Laminate. Ideal for use as a primary exposure suit in warmer waters or as a supplemental undergarment in colder waters.

### OUTER LAYER

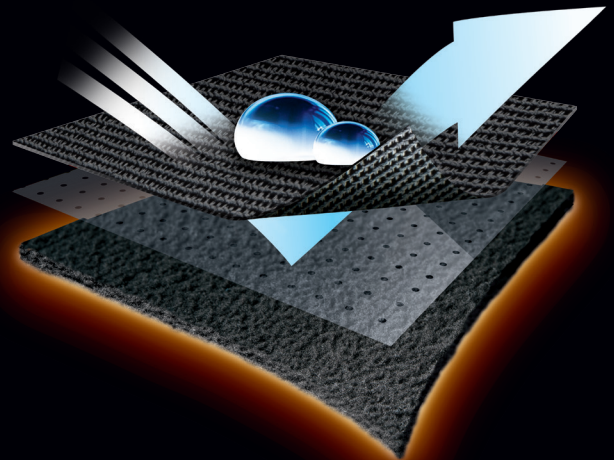

Flexible, durable and water repellent outer layer facilitates fast water run-off and quick drying. UPF 50+

### MIDDLE LAYER

Windproof and breathable middle membrane provides anti-wind chill properties, draws moisture away from the body on the surface and ensures warmth in cold conditions.

### INNER LAYER

Warm, moisture wicking and anti-bacterial inner fleece layer minimizes odor and keeps you warm above and below the surface.

Compared to synthetic fleece lined apparel, Merino™ Laminated lined garments are a super soft yet durable thermal miracle. 35% more thermally efficient and anti-bacterial due to its natural micro fibers.

### OUTER LAYER

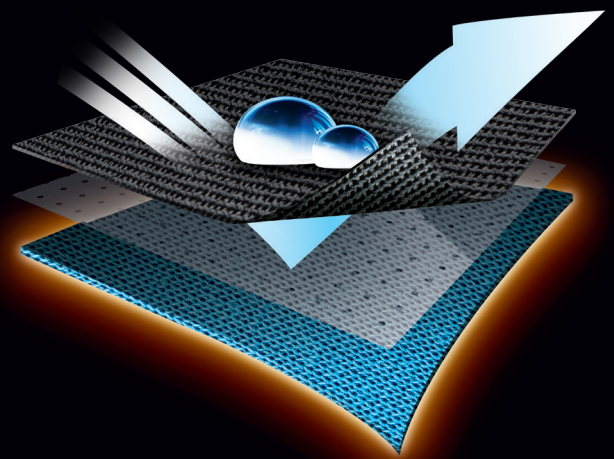

Flexible, durable and water repellent outer layer facilitates fast water run-off and quick drying. UPF 50+

### MIDDLE LAYER

Windproof and breathable middle membrane provides anti-wind chill properties, draws moisture away from the body on the surface and ensures warmth in cold conditions.

### INNER LAYER

Moisture wicking, anti-bacterial and super warm Merino fleece inner layer minimizes odor and keeps you warm above and below the surface.

# SPORTY SHORTY

## LAVASKIN

As part of the Lavaskin product group the Ladies Sporty Shorty offers a Hybrid design using exclusive Polytherm Tri-Laminate material in the body's core area for warmth, windproof and climate control. The lower extremity and shoulders mix our new Lavaskin Polyester outer/fleece inner fabric for ease of movement and UV protection. Besides looking great, it provides the perfect amount of warmth and rash protection for the summer months.

# HOODED VEST

## POLYTHERM

Specifically designed to add an additional warming layer on the torso, head protection and increase comfort when worn under a traditional neoprene wetsuit or LavaCore full suit.

---

Wind-proof middle layer

---

Water resistant outer layer

---

Lightweight and 4-way stretch

---

Breathable middle layer

---

LavaCore is neutrally buoyant

---

All seams are overlapped during flatlock sewing

---

Full gusset incorporated into the underarm

---

Anti-bacterial inner fleece

---

Extended material on back to keep vests from riding up

---

UPF 50+ protection

---
